PaperSonar

Business questions

Phase 1 design deliverable v2 | 10 November 2026

Purpose

The initial fourteen publication questions are retained and broadened with four questions for cross-source identity and research artifacts.

Requirements / design

Q01 topic growth; Q02 topic share; Q03 cohort citation impact; Q04 citation gains; Q05 sparse intersections; Q06 venues/repositories; Q07 institutional contribution; Q08 institutional concentration; Q09 access; Q10 creator activity; Q11 citation/relationship flow; Q12 metadata coverage; Q13 counting sensitivity; Q14 partial-year comparison; Q15 publication-to-dataset/software links; Q16 cross-source match rate; Q17 preprint/version evolution; Q18 funder participation.

Scope and caveats

All questions are candidate definitions. SQL, thresholds and outputs are not implemented; they must be finalized after corpus profiling.

Source and architecture references

See docs/sources.md, docs/architecture/README.md, docs/requirements/incremental-ingestion-design.md, docs/requirements/course-requirements-matrix.md, and the target architecture diagram. Phase 2 and Phase 3 implementation has not started.
